

## Certificate IV in Civil Construction Supervision

### RII40709 Certificate IV in Civil Construction Supervision

#### Course Overview

The Certificate IV in Civil Construction Supervision addresses the responsibilities of those performing the role of foreman, site supervisor or works supervisor.

This program benefits those who are responsible for applying site work instructions and practices to ensure increased productivity, quality and outcomes of others conducting civil construction tasks.

IPS Institute is a nationally registered training organisation servicing the civil construction industry. We have been working with Construction Skills Queensland and have delivered programs for 222 civil construction operators.

IPS incorporates recognition of prior learning into our enrolment process as many of our participants have several years hands-on experience in the civil construction industry. This enables them to concentrate on areas that need development and fast track them through the program.

IPS is very flexible in our delivery strategies and we regularly conduct training on-site. We don't tell you how we run the program, we ask you how you would like it delivered. This makes us very unique in the training industry.

#### Target Audience

- Leading Hands
- Supervisors
- Project Managers
